**Pressure Rated  
Extension Sets**  
featuring

- Pressure rated to 325 psi at a flow rate of 10 ml/sec with 99° F fluid
- Positive Displacement clears the catheter tip and helps maintain a patent line
- Tru-Swab® Technology provides a flat, smooth surface that can be appropriately disinfected
- Dual Seal design reduces microbial ingress
- Contains no metal – safe for MRI
- No Latex or DEHP
- Lipid and Chemo compatible

U.S. Patent: 5,730,418 and 5,782,816

## Maximus Pressure Rated IV Extension Sets

Maximus Pressure Rated Extension Sets feature MaxPlus® connectors for easy and safe access to the IV line. The sets are designed to replace standard extension sets to prevent inadvertent rupture during procedures requiring pressure.

Maximus Pressure Rated Extension Sets are proven to meet the requirements for pressure infusion. Maximus pressure rated sets have been validated under worst case conditions including three days of “simulated use” pre-conditioning followed by delivery of 99° F fluid through an IV catheter at a flow rate of 10 ml/second and pressures up to 325 psi.

To learn more about Maximus Pressure Rated Sets or any of our other products, contact your Maximus representative or visit [www.maximusmedical.com](http://www.maximusmedical.com).
